PROFESSIONAL SUMMARY

Customer Success Specialist with 3 years across enterprise B2B SaaS, split between implementation consulting at Facilio and customer success at Stitchflow. An AI-native builder and customer-facing AI enablement partner: ship internal tools and automations that scale the function into team-wide leverage, pairing CS instincts with a builder's reflex.

IMPACT HIGHLIGHTS

- 4–6 hr → 5–10 min per-customer reporting cycle, automated end-to-end in Claude Code
- 3 of 5 pilots converted to multi-year paid contracts
- ~\$150K ARR / 10+ accounts owned at 90% retention
- Without formal coding experience, built & shipped multiple internal tools and automations under days

EXPERIENCE

Customer Success Associate · Stitchflow, Chennai | 07/2025 – Current

- Own 10+ accounts at ~\$150K ARR with 90% retention, including Vercel, Turing, Fountain, Rula, and SpotOn.
- Run the full post-sale lifecycle: **onboarding, monthly check-ins, product-adoption planning, and expansion** conversations.
- Helped **set up** Stitchflow's CS function: set the reporting cadence, designed QBR / MBR / MVR templates, and built the operating rhythms with product, engineering, sales, and founders.
- Ran end-to-end 4-week customer pilots: workspace setup, app integrations, bug triage with engineering and QA, and BVR delivery in week 4. **Converted 3 of 5 pilots** into multi-year paid contracts.
- Built an end-to-end reporting pipeline using Claude Code that scrapes Stitchflow data, generates monthly impact reports and quarterly BVRs, and auto-delivers via Slack / email. Cut per-customer reporting time from **4-6 hours to 5-10 minutes** across the team's full 20-account book.
- Shipped multiple internal tools and converted day-to-day manual work into automated workflows in days using AI builders, with no prior coding background. **Replaced a manual data-entry workflow** that had capped close-period visibility at 1–2x per week.
- Acted as an **AI enablement partner** for customers, designing and shipping lightweight automations into their day-to-day workflows.

- Spotted recurring pain patterns across accounts and turned them into **prioritized feature requests** with product and engineering. Supported customers on access reviews, audits, and environment cleanup between check-ins.

Implementation Consultant · Facilio, Chennai | 07/2023 – 06/2025

- Led **implementation** and post-sale **onboarding** for enterprise SaaS clients across EMEA and APAC. Delivered **tailored configurations**, **platform walkthroughs**, **adoption workshops**, **UATs**, and user training that reduced time-to-value.
- Ran **enterprise pilots** and **POCs** for British Land and Brookfield. Both converted to **3-year** contracts totaling **\$300,000+** in deal value.
- Tracked onboarding progress, risk areas, and stakeholder communications across deals exceeding **\$1M USD**, owning project transparency from kickoff to go-live.
- Conducted **requirement gathering** and **business discovery sessions**. Translated technical and operational goals into platform configurations and **authored BRDs**, **user guides**, **SOPs**, and process maps used by internal and client teams.
- Supported presales with demo prep, value positioning, and **RFP/RFI** drafting. Advised clients on digitizing workflows.

SKILLS

Customer Success & Onboarding

- B2B SaaS
- Customer Success Management
- Retention & Expansion
- Enterprise Onboarding
- Pilot Execution & POC Management
- BVR / QBR Delivery
- Time-to-Value Reduction

- Stakeholder Management
- Cross-Functional Collaboration
- RFP / RFI Coordination
- Requirements Gathering
- Solution Scoping
- Business & Technical Documentation
- Process Optimization

AI / Automation

- Claude Code (production builds)
- CodeX
- GitHub

- Zapier
- N8N
- MCP Playwright

Tools

- Google Sheets
- Excel
- PowerPoint

- Smartsheet
- Linear

Education

B. Tech, Biotechnology · SASTRA University · 2019 – 2023
